Finsch

8 Dec 1840

In connection with Prof. Mauduit
and Dr. Brundrett & Elizalde, Commissioner at the exhibition
of Paris, I have just seen by the ticket of admission
Dr. Finsch's Hornbill found at the foot of the Andes in Peru.

After his return from Mexico has been to George next
for myself for all my English Dishes & Garden he brought me, &
it was fully described as being of the most delicate quality.
At
Dr. Finsch's suggestion I am sending him (through Mr. Englehardt
in Berlin) a copy.
